

Action plan based on the student feedback received in the spring semester of the 2023/2024 academic year

Department: Institute of Biophysics and radiation Biology
Faculty: Dentistry

Reflection on the implementation of the previous period's action plan:

Students were satisfied with the development of the Moodle teaching materials.

Our feedback on general comments by the students:

Students evaluated Biophysics II teaching, both the lectures and the practicals, generally a bit above the faculty average. The only critical point is the low participation in the lectures. Students admitted that this is mostly due to the large amount of their time devoted to study anatomy, nevertheless, we plan to introduce a new exam favor, which will be available only for those students, who regularly attend lectures.

Our feedback on specific comments on mandatory subjects:

There was no specific feedback comment.

Our feedback on specific comments on elective subjects:

There was no specific feedback comment.

Date: 29-08-2024

The action plan was compiled by:
